

telemetry_common::Config
::get_bool

telemetry_common::Config
::get_double

telemetry_common::Config
::get_int

telemetry_common::Config
::get_string

```
graph LR; A[telemetry_common::Config::get_bool] --> D[telemetry_common::Config::get_string]; B[telemetry_common::Config::get_double] --> D; C[telemetry_common::Config::get_int] --> D;
```

The diagram illustrates a mapping or inheritance relationship. On the left, there are three white rectangular boxes, each containing a function name: 'telemetry_common::Config::get_bool', 'telemetry_common::Config::get_double', and 'telemetry_common::Config::get_int'. On the right, there is a single gray rectangular box containing 'telemetry_common::Config::get_string'. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box, indicating that the three functions on the left are associated with or mapped to the function on the right.
